Welders

GYS Evolution Automatic Spot Welder

- Automatic and manual function C Gun
- 14,500 amps welding current
- Liquid cooled all the way to the welding caps
- Clamping Force of 550 daN at 8 Bar
- Remote control on C Gun Handle
- SD Card for weld quality reporting
- Low Electrical Consumption

GYS BPLCX Automatic Spot Welder

- Ideal X & C clamps for all types of metal works.
- Lightweight and easy to handle.
- Weight: 5kg.
- Single-sided welding tool with 3 metre cable.
- 150mm Control display. Record on SD card.

Welding Consumables

Welders

GYS M1 230V Mig Welder

A Synergic single phase MIG-MAG welding machine. Weld steel, aluminium and MIG Brazing high-tensile strength steels. Synergic Mode which determines the optimum wire speed.

GYS M3 230V Mig Welder

This is a multifunction and flexible machine, with a roll drive motor designed to weld 3 different types c wire at the same time. It saves time as it doesn't require the user to disassemble the torch and change the wire reel for another job.

GYPESPRESS 8T RIVET GUN KIT

An automatic air powered riveter ensuring your shop is capable of repairing the growing number of vehicles requiring panel replacement with rivets including self-piercing rivets and standard flow form rivets.

Dent Pullers

GYS 2600 STEEL DENT PULLER

The GYSPOT 2600, with its 2600 Amp maximum output current is the ideal product for dent pulling and straightening of body panels. Low power consumption, works on a 240V power supply.

GYS EASYLINER 39.02 STEEL DENT PULLER

The GYSPOT Easyline, with 3800 Amp maximum output current is the ideal product for dent pulling and straightening of body panels and comes complete with a trolley, slide hammer, pulling bar and digital controls for ease of use

GYSPOT PROLINER ALU E.FV ALUMINIUM REPAIR

This machine is designed specifically to perform small to medium dent repairs on aluminium. 240 Volt with Synergic control and 7500 Amps of current

GYS SPEEDLINER COMBI 230 E PRO

This is a complete dent repair system for even the most complex of repairs on both Steel and Aluminium. Repair small, medium and large dents without disassembling. 240 Volt with an output of 7500amps of current. 3 Guns - Steel automatic or manual and Aluminium automatic.

Speed Benches

Jollift 1300 Speed Bench

The Jollift 1300 is ideal for small to medium repairs. You can utilise the scissor lift for general repair and add sill clamps and pull posts for chassis straightening. Lowered height of just 100mm.

- 6 Ton Pull Post
- Capacity 3000 kg
- Minimum height 100 mm
- Floor-mounted lift
- Maximum height 1300 mm

Autorobot XLS++ Speed Bench

The Autorobot XLS++ is a multifunctional collision repair system which allows easy reach to the underside of vehicles. With drive-on ramps, a scissor lift, quick vehicle fastening, a versatile pulling tower and ease of operation the XLS++ can't be beaten by comparably priced systems.

- Easy Loading Drive On
- 10T Single Bolt Sill Clamps
- 10T Telescopic Aluminium Pull Post
- New Gen Telescopic Height Extension
- 10T Hydraulics
- Downward Pulling Wheel
- 3,000Kg Lift Capacity
